

ENVIRONMENTAL POLICY

VIOPAR ENERGY SMSA, specializing in the production of electricity with biomass combustion, recognizes the importance of protecting the environment during work as an integral part of the good and socially responsible behavior of a company and is committed to the implementation of an Environmental Management System in accordance with the principles of the ISO 14001:2015 standard in the aforementioned activities, aiming to minimize the impact of its activities on the environment.

The company's Management has identified the threats and opportunities related to its proper, efficient and environmentally friendly operation and is committed to:

- ✓ environmental protection and pollution prevention
- ✓ compliance with the provisions of current Greek and European environmental legislation
- ✓ the recognition of the environmental aspects resulting from the exercise of its activities, identifying those that may have significant environmental effects and taking all the necessary measures to prevent the environmental effects that may be caused by its environmental aspects
- ✓ the appropriate management of the waste produced by the operation in cooperation with licensed carriers
- ✓ defining environmental goals and implementing programs to achieve them
- ✓ assuming responsibility for the effectiveness of the applied system
- ✓ the rational use of natural and energy resources
- ✓ the use of equipment and means of new, environmentally friendly technology
- ✓ the monitoring of the parameters of its operation that may affect the environment, in order to ensure compliance with the permitted emission limits of the current legislation.

The company's goal is the continuous improvement of environmental performance, and the reduction of the environmental footprint of its activity.

In order to achieve the above objectives, the Management provides the necessary resources for the smooth, efficient and effective operation of the company and the System.

The Environmental Management System is reviewed at regular intervals in terms of its completeness and effectiveness, it is modified whenever this is deemed necessary and at the same time it is communicated to the staff.
